

BizBlocks

Management Suite

Building Better Businesses. **Simply.**

BizTalk

BizBlocks

Use the power of SAP's development platform for Business One, The BizBlocks Management Suite is tailor made to your company's growing needs. With software targeting manufacturers, wholesale distributors, professional service companies, rental companies, and just about anyone with a need to improve their business-BizBlocks represents the most powerful application suite for SAP Business One.

Why spend much more for products with features you will never use? Why not give yourself the flexibility to purchase only what you need for now, with the ability to add more later when your needs change? With BizBlocks you get only what you need, when you need it. Like a set of building blocks, BizBlocks allows you to create the perfect software application for your business.

Every product within the BizBlocks Management Suite is fully integrated with the award winning SAP Business One ERP system. No more switching back and forth between applications. Everything you need to run your business is in one convenient location.

For more information, see the enclosed brochures describing each application within the suite. Let us show you how to build your own software application, one block at a time.
